WELLSTOX

Effectiveness of Wellstox and Nots

Main Ingredient	Clostridium botulinum toxin type A
Unit	100 Units
Contents	Human Serum Albumin, Sodium Chloride
Effect	Temporary improvement of moderate to severe glabellar lines that form as a result of corrugator muscles and procerus muscle activity
Dosage Form	Lyophilized powder
Complex Size	Molecular weight of 900 kDa

1 Wellstox's effectiveness

- Smoothing wrinkles and have a muscle contraction effect
- Gives elasticity to saggy face line
- Fast rehabilitation after injection
- Minimize side effects and puffiness

2 Recommendation

- Who struggling with lines and wrinkles
- Who has smile lines and want to correct it
- Who has a progressive muscles/chubby cheeks
- Who has asymmetrical face and want to change it
- Who want to get a V-line face

3 Cautions to avoid after injection Wellstox

- After injection there are appears some side effects and puffiness, but it will disappear after 1~2 days
- Make up and washing face is allowed right away after injection
- Be careful with a drink alcohol, smoking, visit a sauna, taking a hot shower or massage procedures during a one week after injection
- Avoid to eat food that are difficult to chew

Botulinum Toxin prevents the release of the neurotransmitter acetylcholine from axon endings at the neuromuscular junction, thus causing flaccid paralysis.

It paralyzes the facial muscles by diluting this toxin used for the treatment of neurological and muscular diseases by locally paralyzing only the muscles of the injection site to a safe concentration and injecting it into the muscles.

Thick wrinkles on the face are caused by the contraction of the facial expression muscle, and botulinum toxin is injected into this muscle to suppress the action of the nerve that causes muscle contraction, thereby smoothing the wrinkles.

Use for

Skin care clinics  Smooth wrinkles, Hyperhidrosis, Calf muscles	Ophthalmic clinics  Squint, A nictitating spasm etc	Dental clinics  Square jaw, Bruxism	Nerve system Clinis  Esophageal muscle spasm etc
Neurology  Migraine, migraine etc	Urinary system  Prostate, urinary incontinence etc	Rehabilitation medical treatment  Cerebral palsy, post tetanic facilitation	Others  Vocal cord, set of teeth etc

- ✓ Purification of 99% or more high-purity undiluted solution with minimal impurity content through its own state-of-the-art production technology and process
- ✓ Minimize side effects and maximize therapeutic effects by implementing high-purity botulinum toxin

A brand Wellstox provide the highest level of product's quality

Wellstox products, which are the safest and most effective ever made on high quality, optimized manufacturing equipment.

1. Wellstox Botulinum Toxin is a highly natural protein toxic that relaxes the muscles. It is the safest product manufactured under strict quality control standards.
2. Wellstox Botulinum Toxin maintains a stable title by using a strict quality control standard. Also, by a freeze drying process its maintains the safest title and give easily to get to know a result of injection.
